

Dear Hiring Team of Western Engineering,

I'm writing to express my strong interest in Technical /Research Support I. After reading the job description, I'm confident that this is a valuable opportunity where I can apply my skills and continue to grow professionally.

I'm a year_2 student in the CS department of UWO. I'm interested in machine/deep learning. I once participated in a friend's Deepfake project as a volunteer. He also published a conference paper at the end of the project. My contribution at that time was the cleaning, screening and labeling of the data set. At the same time, I also read several versions of his paper and provided some suggestions for English grammar revision. After that I became interested in machine/deep learning.

I also did some work on training models in my own CNN project. This is a model based on yolov5 to identify sheep flocks. It was used to detect the number of sheep in grassland. I also wrote a thesis for that.

I have a great interest in academic research. However, I have not yet found an opportunity to conduct research. So, I would like to take this opportunity to introduce myself.

Thank you for considering my application. I am looking forward to the opportunity to further discuss how I can contribute to your team.

Sincerely,

Junqi(Terry) Zheng
